#1 Cost-Effective Backup
for Service Providers

BDRSuite | BDRCloud

By Vembu Technologies

Cost-Effective | Flexible Licensing | Monthly Billing

Endpoint Backup

Server Backup

SaaS Backup

BDRSuite by Vembu

Agentless VM Backup

Agentless Cloud VM Backup

Application/DB Backup

Why Choose BDRSuite Over the Competition?

Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRCloud

Centralized Management

BDRCloud-Hosted (or) BDRSuite's Self Hosted Management Console

> *We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.*

Ransomware Protection & Recovery

Protect your clients' data against ransomware with Immutable Backups, Two-factor Authentication, 3-2-1 backup, and more. Quickly recover from data loss or ransomware attacks, ensuring business continuity.

Multi-Tenancy

Effortlessly manage multiple client backups by creating and organizing tenants, streamlining backup administration across your client base.

Third-Party Integration

Seamlessly integrate with RMM and PSA tools like ConnectWise, Autotask and utilize BDRSuite WebServices API to customize workflows and automate tasks.

Branding

Offer backup services under your own brand by customizing UI with your logo and company details for a professional, branded experience.
